

Replacement UV lamps for Neolt printers

Our experience with Neolt replacement UV curing lamps is limited. Most likely this is due to the limited popularity of these printers. Regardless, TCS Technologies can provide 100% compatible digital printing lamps for use in your Neolt printer

Neolt printers use two (2) lamps, one on each side of the carriage. To reduce gloss banding and maintain equal UV dosage when printing bi-directionally, it is recommended that both UV lamps be replaced at the same time.

Our lamps cure at the same rate but cost less than the OEM product. More importantly, since we manufacture the lamp ourselves, you will have your lamp far sooner than waiting from Italy.

We manufacture UV curing lamps for the following Neolt printers:

Milano	Superjet	Superjet MT2050
Milano 2050	Milano 2500	Aster-Jet
Aster-Jet 1650	Aster-Jet 2200	

Replacement UV inkjet lamps include:

6JLF0036	AM8587X
